Edible Landscaping

Edible landscaping is the practice of incorporating plants which bear fruits, vegetables or nuts into the home landscape. It is another opportunity to capitalize growing space, especially in urban areas, to produce food and to further local food production, either for the growers household or for donation sites. Many edible plants have attractive foliage and fruits and add to the color of a landscape. It is not too late to add some edibles to your landscape. Lettuce is an easy way to start and there are many varieties of lettuce that are colorful. They grow well in pots too. Plant some now and be ready for BLTs.
